

# Rolling Stones

In English, this term we will be writing some non-fiction pieces based on our learning within the Stone Age.

We will also write a story and playscript based on the famous Mary Anning.

In maths we will be building on our learning from the autumn term. Some of our key focuses will be:

- Place value of numbers up to 1000
- Addition and subtraction including both mental and written strategies
- Multiplication and division
- Fractions
- Times tables including 2s, 5s, 10s, 3s, 4s and 8s.

In history, we will explore how Britain has changed from the Stone Age through to the Iron Age.

A trip to the Natural History Museum!

**TO BE CONFIRMED**

In geography, we will study the area of Skara Brae. Why did people choose to settle here in the past?

It is essential that we stay safe when we are on a digital device and online. We will explore some of the ways in which we do this.

We will also consider how we can use multi-media text, images and sounds to create a short presentation on some of our historical knowledge.

In science, we will explore skeletons and how they are essential in the protection of our vital organs.

We will also explore rocks, fossils and soils and how we can learn from what is found in the ground.

In RE, we will study the concept of messages and how we convey these in our lives.

We will also consider the concept of 'suffering' within the context of the Easter story.

Please continue to support your child through their home learning by reading five times a week, practising spellings/phonics daily and also visiting TTRockstars to practise the times tables. We will also be starting to set maths homework via the 'My Maths' website.
